THE NEWS-BULLETIN

Putting it off today won't get it done tomorrow. An advertisement in this paper today will bring business tomorrow.

Vol. 3 No. 45

MOKENA, ILLINOIS, FRIDAY, JUNE 9, 1922.

Price, \$1.25 per Year

Sells 285 Acres of Land for \$75,000

In a deed filed in the Recorder's office late Friday afternoon of last week, Isadore Phillips becomes the owner of 285 acres of land in Frankfort township. The property was formerly owned by Claude J. Bane and his wife.

The purchase price was \$75,000, of which the grantees assumed trust deeds of \$55,000. This is an average price of \$263 an acre. The land is situated near the old Joliet and Northern Indiana Railroad company's right-of-way. This is now Michigan Central property. Both parties named in the transfer are of Chicago.

Coffee Not Grounds For Separation

Suit for separate maintenance was withdrawn from the Circuit Court Friday of last week by Ruth Delong. The bill was filed in the Circuit Court in February against Allison Delong.

According to the allegations in the bill, Delong was guilty of extreme and repeated cruelty against his wife. She charged that at one time he seized her by the wrists and bent her over backward, injuring her back, and again, the bill charges, he threw coffee grounds at her. On February 10, the bill states, Delong told her to get out and stay out, and if she wasn't out of the house by noon, he would put her out by force.

Delong filed an answer to her charges, denying all of them. The couple reside in New Lenox, and have three children.

Better Lights For Mokena

Mokena is to get better street lights. At the meeting of the village council, held Wednesday night, representatives of the Public Service Co. were present, and explained a new light that will give better illumination at less cost and less consumption of juice. Two test lights are to be installed, one at the intersection of Mokena and Front streets, across from the D. Kolber store; the other at the intersection of Mokena and Second streets, in front of the new church.

CORNER STONE OF NEW \$38,000 MOKENA CHURCH TO BE LAID JUNE 18

The congregation of St. John's Evangelical church of Mokena is about to observe the greatest event in its history by the laying of the corner stone of their new \$38,000 edifice on Sunday, June

18. A very elaborate ceremony is being prepared. The names of the clergymen who will take part will be announced later. The Ernest Wunderlich Granite Co., of Joliet will donate the corner stone.

Reckless Auto Driver Causes Bad Wreck

Failure of an autoist to dim his lights was the cause of a serious auto wreck, in which three Mokena people figured, Friday night. Frank Hirsch, Jr., with his wife and Fred Hentsch, were homeward bound from Joliet, when they met a car going in the opposite direction on the Lincoln highway, near the Hickory creek bridge, west of the red mill. The dazzling lights blinded Mr. Hirsch, who was at the wheel, and in steering out of the way of the oncoming car, he failed to notice a clump of trees at the intersection of three highways, and crashed into them. The windshield was shattered, and the broken glass cut both Mr. and Mrs. Hirsch quite badly about the face and head. Mr. Hentsch who was in the same seat with Mrs. Hirsch escaped injury. The front end of the car was badly smashed.

A passing car was stopped, and Mr. and Mrs. Hirsch were taken to the Silver Cross hospital, where their wounds were dressed, twenty-four stitches being required to close the deep gashes on Mrs. Hirsch's face and head. Mr. and Mrs. Hirsch were later brought to their home in Mokena.

Old Worth Race Track Now City of the Dead

The historic old Worth race track which was the scene of exciting horse races in its day and which attracted once well known horsemen and jockies, has passed into oblivion and is now being converted into a Catholic cemetery.

An Inconsistent Act

"Consistency, Thou Art a Jewel," is a familiar old saying, but, alas! it is only too frequently altered by the little prefix "in," which makes "Inconsistency" out of the otherwise noble word "Consistency." The little prefix "in" crept in the past week with the Mokena Public School faculty when one of the instructors deemed it a brilliant comeback on the editor of this paper to have the school Commencement invitations printed out of town, just because the editor of this paper dared to publish public criticism of the local school and its faculty. Of course, by so doing, an antagonistic spirit was aroused against the editor.

Now, the fact of the matter is, the loss of this one job of printing is not going to force the News-Bulletin out of business, but the principle underlying the deal is what deserves censure. The editor is a taxpayer, and as such pays his honestly earned money toward the upkeep of this school and the payment of the teachers' salaries. In turn he is often asked to give free space to boost the school and to further its interests, but when the same interest, which need and seek publicity have a job of printing that can be executed as well at home as in another city, turn the same away to outside printers, it shows they do not know the meaning of the word "Consistency." If the editor is good enough to boost for the interests of the local school, he is also good enough to do whatever printing the local school requires.

Now we want it understood that the editor is not criticizing the local school board, but is criticizing the member of the teaching faculty who had the Commencement invitations printed elsewhere. We are willing to bet dollars to doughnuts that this job cost a whole lot more than it would have cost to have it printed at home, and the quality and workmanship no better than could be received at home.

Radio Aerial Make An Order Necessary

The Operating Department of the Public Service Co. has found it necessary to direct attention to the large number of radio aerials being installed in various parts of the company's territory. It often happens that these are installed near or over its lines, thus creating a hazard. An order has been issued that no attachments for aerials shall be permitted on any of the company's poles, nor shall the installation of aerials be permitted over any of its lines carrying electric current.

MOVING PICTURE SHOWS

J. C. Kelley of Chicago is giving a series of moving picture shows in Mokena, New Lenox, Worth and Tinley Park. Mr. Kelley is showing good clean pictures along the educational line and is drawing good houses. His show at Mokena last week was largely attended. Mr. Kelley holds many letters of recommendation. Miss Evelyn Hider sings during the performances. She is a very sweet singer. Following are the next dates: Tinley Park, June 10-17; Worth, June 14; Mokena, June 15; New Lenox, June 16 and 18.

Dining Room on the Majestic

ON THE WORLD'S LARGEST SHIP, WHITE STAR LINE

The chief feature of this room is its central part, with a domed ceiling 31 feet high, making it the loftiest apartment ever constructed in a ship. The room occupies portions of E and F decks. It is 117 feet long and 98 feet wide. It seats 652 people, at small tables.

W. H. Bechstein of Mokena Is Married

W. H. Bechstein, Mokena grain dealer and secretary of the Mokena State Bank, and Miss Rose Oswald, daughter of Mrs. Erhardt Oswald, Sr., were quietly united in marriage at the home of the bride in Mokena, Saturday night, at 9 o'clock, Rev. Wm. Kries, of the St. John Evangelical church, performing the ceremony. Only the immediate family witnessed the ceremony.

Wabash Flyer Hits Auto at Chicago Ridge

The St. Louis Flyer, which passes thru Chicago Ridge at 8:25 p. m., hit the front part of Mr. and Mrs. Rudolph Grey's Ford car on Sunday night, June 4th, who, with their daughter, Eleanor, were returning to their residence at 506 South Spaulding avenue, Chicago. They had been visiting Mrs. Grey's brother in Blue Island.

Fortunately no one was injured. Mrs. Grey was badly shaken up. Credit is due Mrs. John Meyers, who saw the oncoming train and called a warning to them, which perhaps saved them from possible death.

Joe Horn, Former Orland Resident, Dead

Mr. Joe Horn, a well known Orland resident, died at the home of his daughter, Mrs. Hattie Koehler, of Blue Island, on Wednesday, May 31. Funeral services were held Saturday afternoon at 1:30 at the German Lutheran church. Interment in the German Lutheran cemetery.

Daily Thought.
The company of just and righteous men is better than wealth and a rich estate.—Buried.

Tinley Park School Sets Fine Record

The Tinley Park Public School has scored an enviable record for notable achievements during the term just closed. Among the notable things achieved are the following:

Sept. 18-19, 1921—Took first prize blue ribbon and \$25 in cash for school handwork at the State Fair held at Palatine.

Dec. 9, 1921—Held Teachers' meeting at the local schoolhouse, at which 50 instructors from all over the county were entertained. This is said to have been one of the best meetings held in the county.

Feb. 24, 1922—Entire class won red ribbon prizes in county preliminary spelling contest.

April 8—Took three out of the four delegate badges which were to have been distributed over Bremen township. All of the schools in the township were entitled to try for these badges, but the local school did such efficient work that they captured all but one of these badges.

May 22—Made four 100% averages at the final examination. Last year one 100% average was made. By combining the two years, this school earned five 100% averages, which places this school first in rank as the only rural school in Cook county having 100% averages.

Thursday, June 1st, Commencement exercises were held at Saenger hall. The program was wonderful, and the attendance, estimated at 1200, was a record-breaker. This was a grand climax for a wonderful year of achievement and success. The teachers and pupils are to be highly complimented on their very excellent work.

WILL GO ON VACATION

Fred Leonhardt who is running a shoe shop at Mokena, leaves on June 17 for Sioux City, Iowa to visit with his son Fred. He will return about July 1. His shoe shop will remain closed during his absence.

TINLEY LOSES 8 to 8

The Tinley Park A. C. base ball team played the Orland team Sunday and lost 8-8. The boys played well. Next Sunday Tinley plays the Monee team at Monee. It is understood that Schilling of Chicago will pitch for Tinley.

It also seems fair that Mr. Lorenz should receive a kindly mention for donating the use of the hall for the benefit of the school children.

Hoping all who read this little article will realize the value the teachers are to the children.

AN APPRECIATIVE RESIDENT OF TINLEY PARK.

Something to Think About

By F. A. WALKER

WHO WANTS TO KNOW

IF YOU are sincere in your desire to know how to achieve, how to make yourself worthy of the highest confidence and thus become competent to hold a place above the ordinary, you will lose no time in acquiring the necessary knowledge.

You will not waste a single hour in idleness or unproductive effort, the basic cause of disappointments and failure.

You will go to your task seriously with unyielding determination to win.

In your pursuit, which in a little while will have become an exhilarating pleasure, you will discover that all the men and women who are holding the prominent places in the beginning of their careers just what you are doing.

They squandered no time in the foolish chase of rainbows, choosing instead the companionship of wise counselors and the pursuit in their spare time of instructive books, seeking truths and principles upon which they could build a substantial foundation for the erection of their life-work.

They tossed the chaff to the winds

Uncommon Sense

By JOHN BLAKE

CANNOT HOARD TIME

IN A certain time you can make a certain amount of money. You can put the money away for years later, but you can't put the time away.

Money, called by the economists frozen labor, might also be called frozen time.

But time is more than money. It can be turned into many things that can be stored away—education, cultivated taste, pleasant and profitable memories. But time itself you cannot hoard. You must use it as it passes, or it is gone forever.

Time spent in recreation is not wasted, unless you spend more than a due allowance for recreation.

But time spent in absolute idleness, or in activities that are worse than idle, is sheer criminal waste.

If you could go back over your life and gather back the hours that have never been improved, you would still have enough time to do great things.

But those hours are gone.

You can only, as Shakespeare says, "regret your dear time's waste" and resolve to waste less of it in the future.

Many men whose time had never been turned to account until they were past forty have still had enough left to accomplish great things in the world.

But these are the most sincere mourners for the years that might have been utilized.

If you will begin today to bear in mind that time cannot be hoarded, and if every hour of it is converted into something that can be hoarded, you may lay the foundation for a fortune. You will certainly lay the foundation for happiness by and by.

Count your hours, and allot each one to some task or to some profitable

and stored with utmost prudence the golden grain.

The greatest men of today, the artists and the crafts, struggled hard in their youth to get a foothold upon the hills. They knew what they were seeking and never relinquished their high purpose or slackened their pace, though they often slipped and went to bed hungry.

Their experiences with the world gave them an understanding of men and affairs with a fullness impossible otherwise.

Their present wealth, power and influence are envied by the thoughtless, who sneeringly talk among themselves of "chance" and "luck," those misnomers for work and pluck.

Being envied is a high distinction. And this is especially true when it is obvious that the real cause of envy is based on the admitted ignorance and regret of men and women who covet distinction but invariably lack courage to take a place in the front and bear the brunt of battle.

The youths of the present who want to know, who are brushing aside obstacles, who are exerting every effort to learn, will in the future be found among the foremost workers and thinkers in the world's great activities, simply because they have with their resolute hearts the spirit and faith, without which no man or woman can hope to win a glorious name.

KIDDIES SIX

By Will M. Maupin

JUNE TIME

SINGIN' o' June, when the roses blow;

Littin' a song when the sun hang low;

Whistlin' away through th' livelong day—

Singin' an' whistlin' a merry tune

To the rosiest month of them all—

That's June.

Watchin' the clouds as theyasten by,

Catchin' the gleam of the bright blue sky;

Lazylin' round on th' sun-kissed ground—

Hearin' th' wind through the wood' and croon

Her songs to the rarest of months—

That's June.

Off through th' meadows cool an' sweet,

Where th' violets bloom in their dim retreat;

Dreamin' dreams by the purlin' streams,

As they hasten by with their rhythmic rune

To the rosiest, fairest month—that's June.

Home at eve when the moon hangs low

And the sky gleams bright with a sil-ver glow;

Just lazylin' there in the old arm chair

A watchin' th' man who lives in the moon

And laughs at th' fairest of months—

That's June.

ILLINOIS NEWS BRIEFLY TOLD

Samuel Bindschadler of Goodfield located a wolf den upon his farm and captured six cubs. The old animals escaped. The bounty aggregated \$60.

The largest class in the history of Northwestern college at Naperville will be graduated June 8, when 72 students will be awarded diplomas. Eighteen states are represented in the group.

Four school children drowned at Centralia in one day. Lee Lee Kratzler, aged fourteen, drowned while swimming in Lake Centralia; Minnie Peckhaus, twelve years old; Margaret Crowley, twelve, and Clara Kleystuber, eleven, drowned when a boat overturned.

Believed to be the largest sum ever awarded by a jury in a personal injury case in central Illinois was the finding in the damage suit of Louis Lerette of La Salle against the Chicago, Burlington & Quincy railway, giving him \$18,000 for the loss of a leg. The defendant company has appealed to the Supreme court.

Farm bureau representatives assembled at DeKalb to make final arrangements for the decennial celebration planned for June 30. The feature will be a pageant with 2,000 persons taking part. National and state officers of the farm bureau will attend. Henry Parke of Genoa, founder of the farm bureau movement, heads the program committee.

The Ogle county fair will be held August 8 to 11, inclusive, at Oregon. Other northern Illinois county fairs for which dates have been fixed are: Jo Daviess county, at Galena, August 1-4; Kane county, at Aurora, August 18-26; Lee county, at Amboy, August 15-18; Winnebago county, at Pecos, August 23-26; Boone county, at Belvidere, August 28-September 3; DeKalb county, at Sandwich, September 5-8.

Four persons were killed and one was seriously injured when an automobile in which they were riding was struck by a Chicago & Eastern Illinois passenger train at Bussers crossing, ten miles south of Vincennes, Ind. The dead are Alvin Hardin, forty-five years old, garage owner, of Danville, Ill.; Mrs. Fannie Hardin, forty years old, wife of Alvin Hardin; Mrs. Leslie English, sister of Mrs. Hardin, and her three-year-old daughter, Betty Lou English, also of Danville, Ill.

With many notables of the American Legion present, the cornerstone of the McBurnie Memorial hall, dedicated to the soldiers of the late war, was laid at Bloomington. National Commander MacNider, State Commander William B. McCauley, O. E. Carlstrom, Aledo, state commander of the United Spanish War Veterans; Andrew Cooper, Minneapolis, Minn., national commander of the World War Veterans, and C. E. Wellman, Danville, state commander of Veterans of Foreign Wars, participated in the program.

Millions of white ants which are rapidly completing the destruction of the house of C. T. Sprague, west of Clinton, have extended their operations to the dwelling of C. F. Weld, across the road from the Sprague dwelling. The Sprague family has been forced to vacate and has appealed to the University of Illinois for aid. All the hardwood flooring has been honeycombed and sills and weatherboarding have been so thoroughly penetrated that pieces collapse when picked up. A finger pushed against the wood in places will pierce it and the slightest pressure crumbles it.

Two districts swept by the spring floods submitted reports showing the extent of the damage done by the waters and the need of relief for the stricken areas. The reports were given to the Illinois Red Cross relief committee and the Illinois flood relief committee, which are co-operating in the raising of funds to assist flood sufferers. In the district between Meredosia on the Illinois river and Spankey Ranch in Jersey county, just below Kampsville, there was a total flooded area of 55,700 acres, according to a report. The loss in this area, including the depreciation in the market value of flooded lands, the destruction of levees and damage to buildings, machinery, crops, etc., is estimated at \$3,761,000. A total of 241 farm families, or 1,446 individuals, and 90 town or city families, including 360 individuals, were driven from their homes by the high water. In Lawrence county a survey shows that 20,000 acres of wheat were destroyed in that county and 118 families are in need of assistance in the way of seed grains and feed for stock.

Northern Illinois Methodists will gather at Epworth grove, near Belvidere, August 3, for the annual session of Centennial Campmeeting association. The meetings will extend through August 13. Many noted church leaders will take part in the program.

The contract has been let for an addition to the Frances Shimer academy at Mount Carroll to be known as William Parker McKee hall. It will cost approximately \$100,000 and will permit considerably larger enrollment of students than at present.

John Phalps, coal miner, shot and killed Gus Crossin, another miner, in Crossin's back yard at Marion. Phalps is held in the county jail without bond. The shooting was the result of a family argument.

Cement concrete pavement, similar to the type of road being constructed in Illinois, is withstanding the test at the Bates experimental road 13 miles southwest of Springfield, according to a bulletin issued by the state division of highways.

Chinch bugs are present in great numbers in the wheat fields of central Illinois, according to W. P. Flint, state entomologist at the University of Illinois, who recently returned from an inspection trip, including thorough examination of the grain in the state.

The Edgar county farm bureau staged a celebration at Twin Lakes park to mark the wiping out of tuberculosis among the 200 herds of cattle in the county. Many stockmen from various counties in the state were present. Edgar county is the only county entirely free from tuberculosis.

At its present rate of growth Chicago will pass Paris in population and become the third largest city of the world in 1924, according to Frederick Rex, municipal reference librarian. Chicago is increasing at the rate of 4,385 a month, Mr. Rex said. At this rate it is estimated the city will have 11,311 more residents than Paris March 1, 1924.

Supporting the contention and the plea of the Illinois farmer for a reduction in railroad freight rates a reduction in railroad freight rates on grain, grain products and hay in carloads, a brief containing evidence and statistics has been forwarded to the interstate commerce commission. It was announced by the Illinois Agricultural association.

The Warren county farm bureau is now in the midst of the first of 30 reorganization campaigns, to be conducted in 1922 by county farm bureaus of the state, in co-operation with the Illinois Agricultural association. Thirty of the 95 county farm bureaus of the state signed three-year contracts with their members in 1919, which expire this year.

Amendments in the Illinois criminal code, the stressing to all members of the bar of their prime responsibility and obligation to help keep the courts clean and efficient for the punishment of criminals, new legislation for crime punishment and the increasing of requirements for entrance to the bar by applicants were leading points in reports of committees of the Illinois State Bar association in its forty-sixth annual meeting at Chicago.

Tension among the citizens of Elgin is running high following the burst of public indignation against the school board after word had spread through the city of the suicide of Miss Mary Elizabeth Long because she apparently was heartbroken over her discharge after 25 years' service as teacher and principal. A committee named at a mass meeting called, when the tension reached its highest point, was to see that "justice" is obtained for 30 other teachers who were discharged or placed on probation at the time Miss Long was dismissed.

Illini Dulcina DeKol, a five-year-old Holstein cow owned by the University of Illinois, now holds the state record for production of milk and butterfat for cows of any breed as the result of a year's test just completed. The cow gave 24,312.7 pounds of milk. Her butterfat production was 998.367 pounds, which is equivalent to 1247.96 pounds of butter. She is the only cow in Illinois which has a production of over 1,200 pounds of butter in one year, according to M. H. Campbell, associate in dairy husbandry at the university.

Quick action toward completing and clearing of obstructions on the waterway between Utica and Lockport was demanded at a mass meeting of engineers, manufacturers, farmers, shippers and business men, held recently at Bloomington. They asked whether the interest on the \$11,000,000 accumulated through taxation in the state treasury to pay for the waterway is being turned into the state coffers or is being disposed of in some other fashion. Speakers deplored the delay since the first effort was made through the voting of a \$20,000,000 bond issue. They said they voiced the sentiment of the entire state in urging immediate construction of the channel.

Damage resulting from the recent flood along the Illinois river was estimated at \$3,200,000, according to a report made to the Illinois State Levee and Drainage Districts association, which met in Springfield and appropriated \$10,000 with which to start suit against the Chicago sanitary district. One hundred members attending the meeting donated \$20 apiece and it was moved, but not acted upon, that each farmer in the 41 drainage districts be assessed \$5 an acre for the association's use. Legal action, it was said, is to be brought against the Chicago sanitary district for alleged illegal practice of emptying an excess amount of water from the lake into the Illinois river.

While the number of fatalities occurring on railroads in Illinois showed a noticeable decrease in 1921 from that of the year 1920, there was a considerable increase in the number of persons killed at street and highway crossings by steam railroads last year.

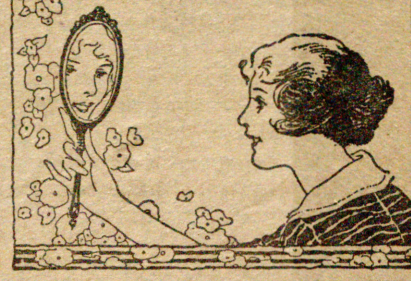

The working forces of the American Car and Foundry company at Madison will be increased July 1 from 1,300 to 2,300 men. This plant has orders to make 4,436 freight cars, which will keep the plants at work eight months.

The Friendly Path

By Walter L. Robinson

EVERYONE MUST PAY

EVERYONE must pay for what he gets.

There is a law of recompense which cannot be evaded or ignored.

If one prizes his happiness he must expect to pay. Eventually the bill collector will demand his toll. Unless payment is made a rough pathway lies directly ahead.

Many constantly fear the bill collector who comes and demands money toll. But he is the most harmless of all the collectors. The real collector to be feared is the one which takes the form of conscience. It is impossible to dodge this one or to frighten him off with a double-barreled gun.

Those who imagine they have ended the collector when in the form of conscience are foolishly deluded. But even though they may get some enjoyment out of life because they think they have satisfied themselves that their consciences were wrong, they can always expect another collector which takes the form of law to hound them until the debt is paid.

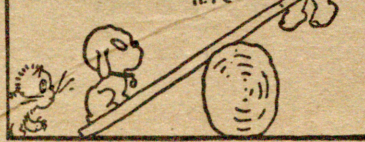

In this age when many fathers and mothers are worried concerning the future of their children, there is good reason to impress upon the young people the importance of being on the square—on the square with the world as well as with themselves. Too many start into their world's pathways bent on getting as much as they can—both in material value and pleasure—without paying for its worth. If parents allow boys and girls, when their characters are in the making, to get this false impression of the way best to get on, sorry days are likely to be ahead not alone for the sons and daughters and their children, but for the fathers and mothers as well.

"The law of compensation is inexorable."

THE CHEERFUL CHERUB

I don't care what the future brings
Or what advantages I lack;
I'm so in love with life today
That thrills are running down my back!

Mother's Cook Book

"A fig tree looking on a fig tree becomes fruitful," says the Arabian proverb. And so it is with children; their first instructor is example.

EVERYDAY GOOD THINGS

NOW is the time to go forth and pluck the early watercress, the wholesome dandelion, the dock and poke, the new shoots of milkweed and marsh marigold or cowslips, all giving the needed zest to the food of spring.

Fresh Dandelion Salad.

Those who appreciate the value of the tender bleached heart of dandelion like it with a bit of salt without any dressing. For a salad the bleached leaves are best, but the tender green shoots, cut and mixed with a small green onion and served with French dressing is a salad not to be despised. Cut the dandelion close to the root, with all the tender green buds. Wash carefully and slice the root from the base, buds and tender leaves for an inch above the root. These use for a fresh salad; the rest of the leaves may be cooked for greens. Another addition to this salad is a thinly sliced tomato, which adds a bit of acid and softens the bitter of the dandelion. Using mayonnaise on the fresh green dandelion is another appetizing method of serving it.

Cooked Dandelion Salad.

Cook the greens until tender, which will take two hours or more unless the greens are very young, then serve with the following salad dressing: Rub a small bowl with a cut clove of garlic, add one-half of a teaspoonful of salt, a few dashes of paprika, two tablespoonfuls of orange juice and four to five

tablespoonfuls of olive oil. Whip this dressing until it is creamy, then serve on the cooked dandelions.

That thrills are running down my back!

Jimmy Murphy Winning the 500-Mile Auto Race

Finish of the 500-mile automobile race at Indianapolis which Jimmie Murphy won in 5:17:30.5, an average of 94.48, breaking all track and international records. He drove a "Murphy Special" car. Inset is the winner after an admirer had decorated him with an Indian war bonnet.

PRINCE FROM LIBERIA

Here is his royal highness, Prince Ko Wie Ghu Donna, son of a Negro racial chieftain of Liberia, a junior class member at the Pennsylvania State college, where he is studying agriculture. Upon graduation he will return to his own country to start an agricultural school, and his fellow students recently raised a subscription to start this school. In appreciation of this kindness Prince Donna consented to appear before the students in his native robes, as shown here.

SHE'S A REAL PIANIST

Little Dorothy Malone of Milwaukee, Wis., who is attracting widespread attention by her piano playing. This little tot, just three years and nine months old, can play and read some of the most difficult selections. Her sense of hearing is so keen that from an adjoining room she can tell what key a person strikes on the piano. Critics predict a brilliant future for her.

Freedom of the City.

"Tomorrow," said the solicitor, "I am being presented with the freedom of the city of London."

"Congratulations, old man!" said his best friend, wringing his hand. "How did you manage it?"

"Simple enough," said the solicitor. "My wife is going to Manchester for a week."—London Tit-Bits.

Golfer Harding Presents the Prize

President Harding presenting Lowell Mellett, of the Washington News with the McLean cup, as winner of the second annual tournament of the Washington Newspaper Golf club. President Harding won fourth place, receiving as a prize a dozen golf balls.

Jury Box Designed for Short Skirts

This new style of jury box has made its appearance in Los Angeles. It has a high solid wall in front and was designed and built as the result of the recent short-skirt fashion, so that jurywomen shall not be embarrassed.

Judge Landis in Line for New Post

Judge Landis, the well-known "boss" of baseball, is headed for a peck of trouble. Just as he got through settling the "Babe" Ruth case and things were going along smoothly, he became involved in the marble war now raging in Chicago. The judge became disgusted at poor shooting by one of the boys and "knuckled down" and showed the youngster how it should be done. Now the kiddies are urging the job of "supreme marble arbitrator" on him.

The KITCHEN CABINET

Copyright, 1922, Western Newspaper Union.

"Censure is like the lightning which strikes the highest mountains."
"We can be more clever than one, but not more clever than them all."

MORE GOOD THINGS

Give the children a treat by making them some good home-made candy.

The following will be easy to make and pleasant to eat:

Pacific Sea Foam.—Take three cupfuls of light brown sugar, one cupful of water, one-fourth teaspoonful of cream of tartar. Cook to the soft ball stage and pour over the well-beaten white of an egg, beat until cool, adding three-fourths of a cupful of walnuts and one-half teaspoonful of vanilla. Drop by teaspoonfuls on a buttered sheet or pour into a well buttered pan.

Chinatown Almond Squares.—Boil together two cupfuls of sugar and one cupful of water eight minutes, then add one-half teaspoonful of vinegar and boil until the syrup is brittle when dropped in cold water. Brown one-half pound of almonds slightly in a buttered pan; now pour over the almonds the hot syrup, which has been flavored with one-half teaspoonful or less of almond extract. Press the candy well down evenly in the pan, using the cut side of half a lemon. Cut before it hardens.

Baked Corn With Clams.—Mix one can of minced clams, one cupful of canned corn, one cupful of milk, and one egg, with one teaspoonful of salt, a speck of onion, salt, pepper and paprika. Place in a baking dish and dot with two tablespoonfuls of butter. Bake one-half hour. Fresh corn may be used.

Potato and Herring Pie.—Peel six potatoes, slice very thin, season with white pepper and mix with one cupful of chopped celery and one-fourth of a scraped onion. Put into a baking dish, in which two tablespoonfuls of butter have been melted and toss the vegetables in the butter until well covered with it. Chop two salted herrings which have been soaked in cold water for an hour or two, mix with the vegetables and pour over the whole one cupful of milk or water. Cover with a baking powder biscuit crust and bake three-quarters of an hour in a moderate oven. Brush over the crust with melted butter before it is quite baked.

Honey Oatmeal Bread.—To one cupful of rolled oats and three cupfuls of hot water, one-half cupful of honey, one tablespoonful of butter and one-half teaspoonful of salt. When lukewarm add one dissolved yeast cake, stir in flour to knead, let rise over night, make into two loaves, let rise again, brush the tops with a teaspoonful of honey mixed with two teaspoonfuls of milk and bake.

"The buttercups, bright-eyed and bold,
Held up their chalices of gold
To catch the sunshine and the dew,
Make sunshine rifts of splendor."

WAYS WITH AVOCADO

The avocado, or alligator pear, as it is commonly called, is the most delicious of foods, but is not yet grown in such quantities as to make them inexpensive. In southern California, where they are beginning to grow

them, in season of plenty they can be bought for twenty to thirty cents apiece, but in the east and central states they reach a price which the ordinary pocketbook holder feels prohibitive. Having proved that this choice food can be produced commercially in a wide area, we have promised of enjoying them at a more reasonable price.

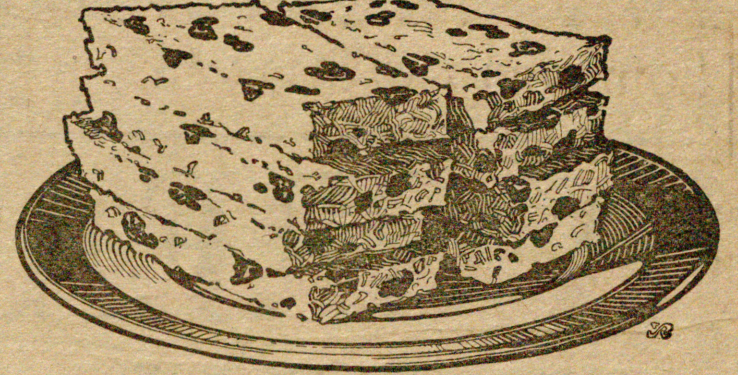

The avocado belongs to the laurel family and is a native of semi-tropical America, whence it has spread to all other tropical countries. The tree is an ornamental with its large leathery leaves of spicy taste and odor, and under favorable circumstances attains a height sixty to eighty feet. It bears prolifically. The fruit varies in shape from round to pear shape, is green and purple in color, weighs often four to five pounds, but the average is much less. The fruit contains a single large seed around which is the thick, buttery flesh of yellowish green color and a delightful flavor. Some varieties have a very thin skin, others a thick, hard shell. These last handle best in shipping.

The dietitians tell us that the avocado is almost in a class by itself, as it has a greater mineral content than any of the fruits and contains 50 per cent of carbohydrates, while its fat content is nearly 30 per cent. The only fruit comparable to it is the olive, which has less oil and is as we know a processed fruit. Measured in calories, the 28 varieties average 984 calories to the pound, more than twice the maximum calories per pound of fresh fruits. Its fuel value corresponds to about 75 per cent of that of cereals and is nearly twice that for average of meat, according to Professor Jaffa.

Brazilian Paste.—Mash ripe avocado and mix smooth with lemon juice. Serve on sliced tomatoes.

Nellie Maxwell

Had Your Iron Today?

Let's Have Raisin Bread Tonight

HOW long since you've had delicious raisin bread—since you've tasted that incomparable flavor?

Serve a loaf tonight. No need to bake it.

Just telephone your grocer or a bakery. Say you want "full-fruited bread—generously filled with luscious, seeded, Sun-Maid Raisins."

The flavor of these raisins permeates the loaf. A cake-like daintiness makes every slice a treat.

Serve it plain at dinner or as a tasty, fruited breakfast toast.

Make delicious bread pudding with left-over slices.

Use it all. You need not waste a crumb.

Raisin bread is luscious, energizing, iron-food. So it's both good and good for you.

Serve it at least twice a week. Start this good habit in your home today.

But don't take any but a real, full-fruited genuine raisin bread.

Your dealer will supply it if you insist.

Sun-Maid Seeded Raisins

Make delicious bread, pies, puddings, cakes, etc. Ask your grocer for them. Send for free book of tested recipes.

GUARDS WOOL FROM MOTHS

New Preparation Said to Preserve the Fabric From Depredations of the Pests.

A preparation has been discovered in Europe which, it is claimed, makes wool immune from the ravages of moths. It is in the form of a powder, which, before it is applied, is mixed in water with a small quantity of sulphuric acid for all-wool goods, formic acid being used for half-wool.

The wool itself is said not to be affected by the application, and only a few colors, very slightly. In case no alkalies are brought into contact with it the wool remains moth-proof when washed. Tests made with two pieces of wool cloth exactly alike, in which moth eggs were placed, resulted, in the course of six months, in the entire disappearance of the untreated fabric, whereas the wool which had been treated remained intact.

Better Pick 'Em Up.

W. T. Ellis, going west in Washington street, saw a hairpin on the sidewalk with the points toward him. He stopped and picked it up. Turning into Capitol avenue, he saw a horseshoe in the street. He picked it up. When he returned to his office a man gave him \$70 that had been due for a long time.—Indianapolis News.

NATURALLY OBJECT OF ENVY

After All, What Is Power and Wealth Compared With Quality That Vincent Possessed?

Vincent wanted fame more than anything else when he was a young man, and he bent all his energies to attaining it; but though it came to many of his friends it passed him by.

Later, he thought that, after all, he would rather have money, for money could buy almost anything, but every venture that promised success turned out to be a failure. He became somewhat bitter, for money seemed to come of itself to others.

He had many friends who held corporations, titles, and in some cases almost the country, in their power. He looked on it in envy, for though he tried with every power within him, he could not make others follow, and his friends seemed to do it easily and naturally.

He hated women. But they followed him around. Everywhere he went some woman was sure to dog his footsteps. And all the other men, who won other things in life, looked on in envy at the ease with which he won them.—Katherine Negley in Judge.

To please others an artist must first please himself—but he must be hard to please.

Let the children share this mealtime beverage

NO NEED to warn the little folks away from the table beverage when Postum is served; every reason to invite every member of the family to join in the enjoyment of this wholesome, satisfying drink.

Postum is made from Nature's best grain—wheat, and contains nothing to harm nerves or digestion.

You'll greatly relish its full-bodied flavor and aroma.

Your grocer has Postum in two forms: Instant Postum (in tins) made instantly in the cup by the addition of boiling water. Postum Cereal (in packages of larger bulk, for those who prefer to make the drink while the meal is being prepared) made by boiling for fully 20 minutes.

Postum for Health
"There's a Reason"

CHICAGO RIDGE
This little town of ours is going up in the world. Harry Foyle is putting up a garage—perhaps he's getting a Rolls Royce. Mr. Reiser's building is nearing completion, which is to be an ice cream parlor and residence. Polchows have Cavallini Ice cream on Sundays. "No loading in this town. Flop, sooner or later," is realized in their case.
Ten of Mr. and Mrs. Polchow's children have had the chicken pox. The eleventh has been so busy that she hasn't had time to get it.
Miss Frieda Polchow was brought home Friday from Chicago very ill. She had been taking care of her sister, Mrs. Eisler, and family, who are ill. From latest reports, her condition is not very favorable.

Peter Toenges Former Tinley Parker Dead
The News-Bulletin is just in receipt of a copy of the Albert Lea Tribune, giving an account of the death of Peter Toenges, once well known resident of Bachelors' Grove. He at one time lived on the farm now tenanted by Wm. Witt. Following is the account of his death:
Peter Toenges was born April 10, 1859, at Renhartshausen Furstenburg, Valdeck, Germany, and was baptized and confirmed in the German Lutheran church in Germany.
At the age of 17, in the year 1876, he sailed with his sister to this country. It required 21 days to make the trip. They landed in New York, and then came directly to Cook county, Ill.
Mr. Toenges endured the hardships of those days. He was at that time very young, and the work had to be done with oxen.
On May 25, 1882, he was united in marriage with Miss Katherine Sipple. The union was blessed with seven children, four boys and three girls. One son died five years ago.
Mr. Toenges purchased a farm in Cook county, Ill., where they lived twenty years. After having sold his farm, he went to Kansas and Nebraska in search of a new home, but not being satisfied with the country, he returned, and removed with his father-in-law and family to Minnesota, and stayed a short time with his brother-in-law, Mr. Gotzke. But yet dissatisfied, he returned to Iowa in search of a new home, but again returned to Minnesota, and finally settled on the well known Toenges farm 2 1/2 miles northwest of Armstrong.
In 1905 he moved to Albert Lea, and stayed six years, but on account of poor health, returned to his old home and stayed with his son John.
The deceased was a good husband, a kind father, a good-natured friend and neighbor, a faithful Christian, and one of the oldest members of the German Lutheran church of Pickeral Lake.
He had been in poor health for a number of years, but on Feb. 5 his health failed him more, and developed into heart disease, which caused his death on Friday morning, April 28, 1922, at 3:30 o'clock, at the age of 63 years and 11 days.
He is survived by his good and kind wife, 6 children, 25 grandchildren and 25 great-grandchildren; William Toenges and Mrs. B. Abbe, of Alden township; Fred and John, on the home place in Manchester township; Mrs. Wm. Pastorius, of Pickeral Lake, and Mrs. Charles Baker, of California.
The funeral took place at the German Lutheran church, Rev. H. F. Pliffler officiating.

Coming- The Great NEW LENOX

CHAUTAUQUA

JUNE 15-16-17-18

ABOVE ALL BE SURE AND COME!

Play the Game to Win.
When you take life in the spirit of the game, you remove most of the loads from the way. You can do more and enjoy it by mixing pleasure and rest with the burden. The smiles you give will tempt others to follow and in the company of congenial spirits winning the game is the natural thing. Live your game. Go in to win. All that you put in effort will come out in triumph.
Which.
Dickie, the six-year-old in a certain Washington family, has become somewhat perplexed through hearing discussions of current events and of school topics. "Dad," he asked one evening, "which is longer the shortest or the longest of the seasons?"

SPANISH DOUBLOONS

(CHAPTER XVII—Continued.)

"Down, Crusoe!" I kept desperately whispering. But Crusoe was unused to whispered orders. He kept bounding up on me, intent to fulfill an unachieved ambition of licking my ear. Cuthbert Vane tried, under his breath, to lure him away. But Crusoe's emotions were all for me, and swiftly becoming uncontrollable they burst forth in a volley of shrill yelps.

A loud cry answered them. It came from Captain Magnus, who had scrambled to his feet and was staggering across the clearing. One hand was groping at his belt—it was flourished in the air with the gleam of a knife in it—and staggering and shouting the captain came on.

"Ah, you would, would you? I'll teach you—but first I'll settle him, the porridge-eatin' Scotch swine!"

The reeling figure with the knife was right above me. I sprang up, in my hand the little two-inch weapon which was all I had for my defense—and Dugald Shaw's. There were loud noises in my ears, the shouting of men, and a shrill continuous note which I have since realized came from the lungs of Miss Higglesby-Browne. Magnus made a lunge forward—the arm with the knife descended. I caught it—wrenched at it frantically—striving blindly to wield my little penknife, whether or not with deadly intent I don't know to this day. He turned on me savagely, and the penknife was whirled from my hand as he caught my wrist in a terrible clutch.

All I remember after that is the terrible steely grip of the captain's arms and a face, flushed, wild-eyed, horrible, that was close to mine and inevitably coming closer, though I fought and tore at it—of hot feverish lips, whose touch I knew would scorch me to the soul—and then I was suddenly free, and falling, falling, a long way through darkness.

CHAPTER XVIII.

The Young Person Scores.

My first memory is of voices, and after that I was shot swiftly out of a tunnel from an immense distance and opened my eyes upon the same faces which I had left at some indefinite period in the past. There was Aunt Jane's, very tearful, and Miss Higglesby-Browne's, very grim, and the Honorable Cuthbert's, very anxious and a little dazed, and Cookie's, very, very black. The face of Dugald Shaw I did not see, for the quite intelligible reason that I was lying with my head upon his shoulder.

As soon as I realized this I sat up suddenly, while every one exclaimed at once, "There, she's quite all right—see how her color is coming back!"

The penknife that I had lost in my struggle with Captain Magnus had fallen at the Scotchman's feet. Wrenching himself free of his all but severed bonds he had seized the knife, slashed through the rope that held him to the tree, and flung himself on Captain Magnus. It was a brief struggle—a fist neatly planted on the ruffian's jaw had ended it, and the captain, half dazed from his potatoes, went down limply.

Throughout the fray Chris slumbered undisturbed, and he and the unconscious Magnus were now reposing side by side, until they should awake to find themselves neatly trussed up with Cookie's clothes-lines.

But my poor brave Crusoe dragged a broken leg, from a kick bestowed on him by Captain Magnus, at whom he had flown valiantly in my defense.

So far so good; we had signally defeated our two guards, and the camp was ours. But what about the pirates who were still in the cave and would shortly be returning from it? They were three armed and sturdy ruffians. It would mean a battle to the death.

Our best hope would be to wait in ambush behind the trees of the clearing—I mean for Dugald Shaw and Cuthbert Vane to do it—and shoot down the unsuspecting pirates as they returned. This desperate plan, which so unpleasantly resembled murder, cast gloom on every brow.

"It's the women, lad," said the Scotchman in a low voice to Cuthbert. "It's—it's Virginia." And Cuthbert heavily assented.

Seeing myself as the motif of such slaughter shocked my mind suddenly back to clearness.

"Oh," I cried, "not that. Why not surprise them in the cave, and make them stay there? One man could guard the entrance easily—and afterward we could build it up with logs or something."

Everybody stared.

"A remarkably neat scheme," said Mr. Shaw, "but impossible of application, I'm afraid, because none of us know where to find the cave."

I shook my head.

"I know!"

There was a lengthy silence. People looked at one another, and their

eyes said, "This has been too much for her!"

"I know," I impatiently repeated. "I can take you straight there. I found the tombstone before Mr. Tabbs did, and the cave, too. Come, let's not waste time. We must hurry—they'll be getting back!"

Amazement, still more than half incredulous, surged round me. Then Mr. Shaw said rapidly:

"You're right. Of course, if you have found the cave, the best thing we can do is to keep them shut up in it. But we must move fast—perhaps we're too late already. If they have found the chest they may by now be starting for camp with the first load of doubloons."

Again I shook my head.

"They haven't found the gold," I assured him.

The astonished faces grew more anxious. "It sho' have told on'll'e Miss Jinny's brain," muttered Cookie to himself.

"They haven't found the gold," I reiterated with emphasis, "because the gold is not in the cave. Don't ask me how I know, because there isn't time to tell you. There was no gold there but the two bags that the pirates brought back last night. The—the skeleton moved it all out."

"My Lawd!" groaned Cookie, staggering backward.

"Virginia! I had no idea you were superstitious!" quavered Aunt Jane.

"I say, do take some sleeping tablets or something and quiet your nerves!" implored Cuthbert with the tenderest solicitude.

In my exasperation I stamped my foot.

"And while we are arguing here the pirates may be starting back to camp! And then we'll have to kill them and go home and give ourselves up to be hanged! Please, please, come with me and let me show you that I know!" I lifted my eyes to the intent face of Dugald Shaw.

"All right," he said tersely. "I think you do know. How and what, we'll find out later." Rapidly he made his plan, got together the things needful for its execution, looked to the bonds of the still dazed and drowsy prisoners, posted Cookie in their neighborhood with a pair of pistols, and commanded Aunt Jane to dry her tears and look after Miss Higglesby-Browne, who had dismayed every one by most inopportunistically toppling over in a perfectly genuine swoon.

Then the Scotchman, Cuthbert Vane and I set off through the woods. The men were heavily armed, and I had recovered my own little revolver and

We Went in Silence Through the Green Hush of the Woods.

restored it to my belt. Mr. Shaw had seen to this, and had said to me, very quietly:

"You know, Virginia, if things don't go our way, it may be necessary for you to use it—on yourself."

And I nodded assentingly.

We went in silence through the green hush of the woods, moving in single file. My place as guide was in the van, but Mr. Shaw deposed me from it and went ahead himself, while Cuthbert Vane brought up the rear.

No one spoke, even to whisper. I guided Dugald Shaw, when needful, by a light touch upon the arm. Our enterprise was one of utmost danger. If we met the pirates it was their lives or ours—and I recall with incredulity my resolution to imbed five of my six bullets in a pirate before I turned the sixth upon myself.

We passed the grave, and I saw that the vines had been torn aside again, and that the tombstone was gone. We came to the brink of the cliff, and I

pointed silently downward along the ledge to the angle in which lay the mouth of the cave. My breath came quickly, for at any instant a head might be thrust forth from the opening.

Mr. Shaw and Cuthbert dropped down upon the ledge. Though under whispered orders to retreat I could not, but hung over the edge of the cliff, eager and breathless. Then with a bound the men were beside me. Mr. Shaw caught my hand, and we rushed together into the woods.

A quake, a roar, a shower of flying rocks. It was over—the dynamite had done its work, whether successfully or not remained to be seen. After a little the Scotchman ventured back. He returned to us where we waited in the woods—Cuthbert to mount guard over me—with a cleared face.

"It's all right," he said. "The entrance is completely blocked. I set the charge six feet inside, but the roof is down clear to the mouth. Poor wretches—they have all come pouring out upon the sand!"

All three of us went back to the edge of the cliff. Seventy feet below, on the narrow strip of sand before the sea-mouth of the cave, we saw the figures of four men, who ran wildly about and sought for a foothold on the sheer-face of the cliff. As we stood watching them, with, on my part, at least, unexpected qualms of pity and a cold interior sensation very unlike triumph, they discovered us. Then for the first time, I suppose, they understood the nature of their disaster. We could not hear their cries, but we saw arms stretched out to us, fists frantically shaken, hands lifted in prayer. We saw Mr. Tabbs flop down upon his unaccustomed knees—it was all rather horrible.

I drew back, shivering. "It won't be for long, of course," I said uncertainly, "just till the steamer comes—and we'll give them lots to eat—but I suppose they think—they will soon be just a lot more skeletons—" And here I was threatened with a moist anticlimax to my late Amazonian mood.

Why should the frequent and natural phenomena of tears produce such panic in the male breast? "It's been too much for her!" exclaimed the once dour Scot in tones of anguish. "Hurry, lad—we must find her some water!"

"Nonsense," I interposed, winking rapidly. "Just think of some way to calm those creatures, so that I shan't see them in my dreams, begging and beseeching—" For I had not forgotten the immensity of my debt to Tony.

So a note was written on a leaf torn from a pocketbook and thrown over the cliff weighted with a stone. The captives swooped upon it. Followed then a vivid pantomime by Tony, expressive of eased if unrepentant minds, while Mr. Tabbs, by gestures, indicated that though sadly misunderstood, old H. H. was still our friend and benefactor.

It was an attentive group to which on our return to camp I related the circumstances which had made possible our late exploit of imprisoning the pirates in the cave. The tale of my achievements, though recounted with due modesty, seemed to put the finishing touch to the extinction of Violet, for she wilted finally and forever, and was henceforth even bullied by Aunt Jane. The diary of Peter was produced, and passed about with awe from hand to hand. Yesterday's discovery in the cave had rounded out the history of Peter to a melancholy completion. But though we knew the end we guessed in vain at the beginning, at Peter's name, at that of the old grandfather whose thrifty piety had brought him to Havana and to the acquaintance of the dying mate of the Bonny Lass, at the whereabouts of the old New England farm which had been mortgaged to buy the Island Queen, at the identity of Helen, who waited still, perhaps, for the lover who never would return.

But even our regrets for Peter did not chill the exultation with which we thought of the treasure-chest waiting there under the sand in the cabin of the Island Queen.

All afternoon we talked of it. That, for the present, was all we could do. There were the two prisoners in camp to be guarded—and they had presently awakened and made remarks of a strongly personal and unpleasant trend on discovering their situation. There was Crusoe invalided, and needing petting, and getting it from everybody on the score of his romantic past as Benjy as well as of his present virtues. The broken leg had been cleverly set by Dugald—somehow in the late upheaval Miss and Mister had dropped each out of our vocabularies—with Cuthbert as surgeon's assistant and me holding the chloroform to the patient's nose. There was the fatigue and reaction from excitement which everybody felt, and Peter's diary to be read, and golden dreams to be indulged. And there was the delicate question to be discussed, of how the treasure should be divided.

"Why, it all belongs to Virginia, of course," said Cuthbert, opening his eyes at the thought of any other view being taken but this obvious one. "Nonsense!" I hastily interposed. "My finding the diary was just an accident; I'll take a share of it—no more."

Here Miss Browne murmured something half inaudible about "confined to members of the expedition—" but subsided for lack of encouragement.

(TO BE CONTINUED.)

Telephone to Deaf.

The receiver of a telephone set for the deaf that has been invented in Germany is small enough to be hidden in a person's ear, while the transmitter can be carried in a handbag or fastened to clothing.

THE SHEEP

"They had to take a lamb to sell in the market," said Daddy, "and so they were going to give the Mother Sheep whose lamb they had taken another lamb to look after."

"In order that Mother Sheep would not feel badly and in order to make her look after the new lamb they took the skin of the lamb that had been killed and sold in the market and put it over her newly adopted lamb."

"The little alive lamb wore the other lamb's skin over him as a cape until Mother Sheep became used to him. Then he did not wear it any longer after she was willing to take him as her own."

"Then she looked after him and nursed him and mothered him."

"But at first he had had to wear the skin of the other one so he would have a familiar smell."

"Now there are black-faced sheep," Daddy continued, "known as Shropshires. They have black legs too. Their wool is medium wool and the white faced sheep have coarse wool."

"There are different kinds of wool, coarse and Merino and fine and downy and Persian."

"There isn't any sense as far as I have ever been able to make out," said Daddy, "to the saying that any member of a family who isn't as nice as the other members is a black sheep."

"For there is nothing harmful about black sheep that I could ever make out."

"Now by a field where there were many sheep there passed a long train of cars filled with coal."

"Two engines were pulling this great long train of cars. It seemed like an endless load. But the cars seemed to be willing to be pulled along as there were the two strong engines puffing for all they were worth."

"They stopped for awhile by the Sheep field and one of the Sheep said, 'Baa, baa, baa, there is a great deal of coal there.'"

"'Baa, baa, baa,' said another Sheep, 'coal is not particularly beautiful.'"

"'But I suppose it is useful,' said a third."

"'Yes,' said a fourth, 'and it's quite grand for the coal to be carried along by two engines and to require so much grandeur.'"

"'That does seem impressive,' said a fifth Sheep."

"'Well,' said the sixth Sheep, 'perhaps it isn't grand to ride in a coal car, but still if one is a piece of coal

it is grand to ride in a coal car I should think."

"'And it is quite a suitable and proper thing to do.'"

"'Quite, baa, baa, quite,' said a seventh Sheep."

"'I think it's fine that they have cars all to themselves. That's what I think,' said an eighth Sheep."

"'Yes, I agree, baa, baa, baa, I agree,' said a ninth Sheep."

"'For,' he continued, 'I remember when Granddaddy was traveling from the farm in the next state to this farm. He didn't have a car all to himself.'"

"'There were trunks and boxes and all sorts of things in the same car as he was in.'"

"'I hope the coal is thinking of the honor,' said another Sheep."

"'I doubt it,' said yet another. 'Coal can't think as coal isn't human. Coal is mineral. Baa, baa, baa, that's quite bright of me. Quite bright of me.'"

"'Then the coal cars, drawn by the two engines, started off again, and the Sheep bleated and said, each to the other,

"'Coal is a mineral. We've learned that today. And Sheep are animals.'"

"'And the little baby tomatoes growing on yonder vine, both the yellow ones and the red ones—they're vegetables. So we're all fixed up, baa, baa, baa. We're all fixed up!'"

"'And what the Sheep bleated was the truth,' ended Daddy."

His Preference.

Willie was in a bad temper. His mother had just discovered that there was not a clean nightshirt ready for him to wear.

"Never mind, Willie," she said consolingly. "You will have to put on one of your sister's nightgowns tonight."

"What! A girl's?" snorted Willie, drawing himself up haughtily.

"Yes. Why not?" asked mother in surprise.

"I won't wear it!" declared the small boy. "I'd rather go to bed raw!"

IMPROVED UNIFORM INTERNATIONAL

Sunday School Lesson

(By REV. P. B. FITZWATER, D. D., Teacher of English Bible in the Moody Bible Institute of Chicago.)
Copyright, 1922, Western Newspaper Union.

LESSON FOR JUNE 11

JEREMIAH CAST INTO PRISON

LESSON TEXT—Jeremiah 38:1-13.

GOLDEN TEXT—Be not afraid of their faces: for I am with thee to deliver thee, saith the Lord.—Jer. 1:8.

REFERENCE MATERIAL.—Gen. 39: 19-23; Jer. 26:1-18; Luke 3:18-20; Acts 12: 1-11; 16:19-34.

PRIMARY TOPIC—How God Cared for Jeremiah.

JUNIOR TOPIC—Jeremiah's Bold Truth-telling.

INTERMEDIATE AND SENIOR TOPIC—Faithful in the Face of Danger.

YOUNG PEOPLE AND ADULT TOPIC—Lessons From Jeremiah's Character.

I. Jeremiah Predicts the Capture of Jerusalem (vv. 1-3).

1. To Whom—the People (v. 1). Jeremiah had been taken out of the prison by the king (37:17), and ordered confined to the court of the prison (37:21). The people seem to have had free access to him in the court (32:12). From this place of limited confinement Jeremiah announced to the people their approaching captivity.

2. Counsel Given (vv. 2, 3). (1) All that remaineth in the city shall die by the sword, famine and pestilence. (2) He that goeth forth to the Chaldeans shall live. "He shall have his life for a prey" doubtless means that he shall escape with his life, though losing all else.

II. Jeremiah Accused by the Princes (vv. 4, 5).

1. "He weakeneth the hands of the men and all the people" (v. 4). From a human standpoint what they said was true, but since Jeremiah was but the interpreter of God to the nation they ought to have heeded his advice to surrender.

2. "This man seeketh not the welfare of this people, but the hurt" (v. 4). This charge was utterly false. Jeremiah was the best friend of the people, for he faithfully proclaimed to them God's judgment upon them for their sins and advised them how to make the best of their unfortunate situation.

3. The King's Cowardly Act (v. 5).

Jeremiah is abandoned by his cowardly friend. The very one whom Jeremiah was trying to help deserted him. The king was afraid of the Chaldeans, the princes, Jeremiah and God.

III. Jeremiah Cast into the Dungeon (v. 6).

This was not a regular prison, but a cistern which had doubtless been emptied of its water during the siege, leaving only "mire." Into this mire he sank. The purpose was to let Jeremiah die there. There was no possible way to escape. In this situation Jeremiah is a type of Christ (Psalm 69). Jeremiah was one of the bravest of God's servants.

IV. Jeremiah Rescued From the Dungeon (vv. 7-13).

1. By Whom—Ebed-melech, an African servant (vv. 7-9). The Jewish prophet whom his own countrymen tried to destroy is saved by a Gentile, which may be thought of as foreshadowing the Gentiles' attitude toward Christ. Though Ebed-melech had a colored skin he was the whitest man in Jerusalem. He was not only sympathetic, but courageous. He went to the king and boldly declared that the princes had done evil in imprisoning Jeremiah.

2. The Method (vv. 10-13). The king yielded to his request and furnished a guard to prevent interference with the work of rescue. He let down soft rags and worn-out garments by ropes and instructed Jeremiah to put them under his arms and under the ropes so as to prevent injury to him as he was lifted up. They lifted him out of the dungeon and he was permitted the freedom of the court of the prison.

Why did Jeremiah have such a hard time? Why do the purest and best men and women have to suffer? Why are God's prophets unpopular? Jeremiah, the prophet who declared God's power to deliver, goes to prison and suffers. "Why do the righteous suffer" is an age-old question.

1. The power of God is more strikingly shown in deliverance than in keeping from trials. This was so in the case of the Hebrews in the fiery furnace and Daniel in the den of lions.

2. Great gain accrues to the sufferers; e. g. the Hebrews in the fiery furnace were not only kept from being burned, but had walking with them the Son of God; Job through his trials was brought to see himself.

3. Suffering turns out to be the furtherance of God's cause; e. g. Job becomes the priest through whose intercession his friends are pardoned; Paul's sufferings furthered the preaching of the gospel; John through banishment on the Isle of Patmos was given the vision of the Revelation.

Zion.

But Judah shall dwell for ever, and Jerusalem from generation to generation. For I will cleanse their blood that I have not cleansed: for the Lord dwelleth in Zion.—Joel 3:20 and 21.

Be Honest.

Recompense to no man evil for evil. Provide things honest in the sight of all men.—Romans 17.

The Perfect Man.

If any man offend not in word, the same is a perfect man.—James 3:2.

—Detroit News.

SCIENCE ON FARM

Agriculturist of Today Must Know Business Thoroughly.

Canadian Tillers of the Soil Have Proved That Old Days of Hazard Methods Have Gone.

Agriculture in Canada has the status of a profession which both its high standard of operation and the prime place it occupies in national life justify. The days when land was casually filed on and farmed without any intelligent understanding of agricultural processes are going with the dwindling availability of the land, and rapidly passing is the epoch of the destruction of soil values, and the abandonment of farms which have been rendered unproductive. Clearer and clearer has become the realization that farming is a specialized profession requiring special training, and in the place of this spoliation there is an intelligent system of crop rotation, preservation of the virtue of the land, a discovery of the nobility of the farmer's calling and a determination to secure and achieve the best possible in everything.

The Education of the Farmer.

Agricultural colleges, experimental farms, government literature, railway propaganda, all in an appreciation of the national benefits which accrue, contribute to the education of the farmer who, if he starts out in ignorance, speedily discovers the futility and profitlessness of continuing in this state. It is only of comparatively recent years that farming in Canada has become the comprehensive and exhaustive study it is and its tenets been so widely absorbed, and older farmers who have followed haphazard methods or systems scientifically unsound are gradually forced from necessity into an intelligent study and application of their profession.

This brings us to the city man who is anxious to leave his old life for the greater freedom of the country and take a farm for himself, and the foregoing holding good, he need not follow far behind the older farmer if he take up the study of his work seriously, bring energy and intelligence to bear upon a following out of the systems of experienced and successful agriculturists, and utilize the results of the expert investigation and research the Dominion places at his disposal. The whole country is working for him and the novice has almost an equal opportunity with the farmer of a lifetime.

A census of Canadian farmers would probably show that fully one-half are not farmers' sons and were not brought up to the life of the farm. Yet none would criticize Canada's farmers on the score of poor farming methods in general, the excellency of their crops with international honors and the universal demand for their live-stock products refuting this effectually. Significant is it, too, that practically all the farmers who have achieved the most signal honors at international farming competitions have not been lifelong farmers, but city men who, taking to the land after reaching maturity without the remotest previous knowledge of agricultural activities, have through intelligent study and close application of the best farming methods surpassed the efforts of those agriculturists who have continued doing things on the farm in the way their fathers used to do them.

For further particulars, pamphlets regarding Canada, railway rates, etc., apply to C. J. Broughton, Room 412, 112 W. Adams St., Chicago, Ill.; J. M. MacLachlan, 10 Jefferson Avenue, Detroit, Michigan.—Advertisement.

POWER IN THIS FLASHLIGHT

Continued Experiments Have Resulted in Development of a Really Remarkable Article.

From the pocket flashlight operated by two or three dry cells of minute size the battery searchlight has been steadily improved until remarkable results are obtained.

Some time ago there was devised a searchlight of 500 feet range operating on six or eight volts. More recently a battery searchlight has been introduced with a range of 2,000 feet up to half a mile, operating on six volts. Equipped with a seven and one-half inch adjustable focus, single shell reflector, on a recent photometer test one of these searchlights gave 453 candlepower.

The combination of a nitrogen-filled tungsten lamp and a correctly designed reflector has worked wonders for the battery-operated searchlight. —New York Herald.

Birds Help Man.

Remember the birds this spring. The possibilities of the increase of forest insects are so appalling that potent forces to keep them within bounds are indispensable; otherwise, insects might destroy all forest trees. The numbers of insect species that attack a single tree sometimes run into hundreds, and the individuals of each species, if unchecked, would soon number untold millions. Before such countless hordes man would be powerless.

Getting It Straight.

He—So you have finally decided that you cannot marry me.

She—You are mistaken. I knew all along that I could marry you. What I've decided is that you cannot marry me.—Boston Transcript.

Most of the experience that a man gets comes too late.

ORLAND.

Mr. and Mrs. Edgar Cooper and daughter Pearl, Mr. and Mrs. Charles Cooper and son Stanley, Mr. and Mrs. Thomas Cooper and daughter Lucille and Mr. and Mrs. Harvey Cooper were entertained at the home of Mrs. Louis Andres, of Peotone, Ill., Sunday.

Mr. and Mrs. E. F. Dunlop, of Englewood, spent the week-end at the home of Mrs. Hattie Gee.

The Ladies' Guild of the Orland M. E. church will hold their monthly meeting Friday, June 9, at the home of Mrs. Ralph Stillwagon.

Mr. and Mrs. William Keuch entertained Mr. and Mrs. William Yunker and family at dinner Sunday.

Mr. and Mrs. Alfred Schilling, of Ethel Mann and Mrs. Henry M. Sche motored to Starved Rock Sunday.

Mrs. and Mrs. Elmer Newton entertained Mr. and Mrs. Bob Hewson of Indiana, Mr. and Mrs.

Henry Henke and family of Tinley Park, Mr. and Mrs. Matthew Newton of Mokena, and Mr. John Cooper and family at dinner Sunday.

Mr. and Mrs. H. A. Martin and children, of Englewood, were the guests of Mr. and Mrs. John Loeb on May 30.

Miss Olive Norton, of Minnesota, is visiting Miss E. Norton.

A miscellaneous shower was given in honor of Miss Helen McEnkle by the ladies of the community on the afternoon of May 31. Neither Miss McEnkle or Miss Norton will teach at the Orland Grammar school in the fall.

The graduation exercises of the Orland Grammar School were held at the Woodman hall on Wednesday, May 31. The graduates were Verla DeWesse, Clara Yunker, Mabel Rust, Earl Moore, Roy Cannon and Orville Schmadeke, Alfonso Soderlund, Clarence Soderlund, Irene Stelter and Lois Ludwig.

The Commencement exercises of the Orland High School will be held in the M. E. church on Tuesday evening, June 13.

Mr. G. Jones, of Englewood, was the guest of Mr. and Mrs. T. H. Davidson, Sunday.

The Orland high school baseball team was defeated in the game with Argo high school, played at the Palos Park Festival, on Friday, June 2. The team will play the Glenwood high school team at the Glenwood Festival, to be held in the Glenwood Forest Preserve, on Wednesday, June 7.

Mr. and Mrs. Earl Zimmerman and son Earl, Mrs. G. Zimmerman, Sr., of Chicago, Mr. and Mrs. I. D. Marti, of Mokena, Mr. and Mrs. George Megarry and children were the guests of the Wm. T. Beagley family on May 30th.

Miss Pearl Beagley of Chicago was a guest at the home of her brother, Mr. Clarence Beagley, on Tuesday, May 30.

William Beagley, Jr. was the guest of Earl Moore Sunday, June 4.

Chas. Andres of Tinley Park Dies in Blue Is.

Chas. Andres, aged 40 years, who was operated on at St. Francis hospital, Blue Island, for appendicitis, three weeks ago, underwent a second operation the fore part of the week, and died Wednesday night at 11 o'clock.

He is survived by his widow, three children—Raymond, Bernard and Margaret; two brothers—John, of Peotone, Edward, and two sisters—Mrs. Clara Roesner, of Tinley Park, and Mrs. Leona Bettenhausen, Blue Island. Funeral arrangements have not been completed.

Job Printing

We are equipped to handle any kind of Job Printing, and when it comes to Service, we can only refer you to our customers or ask that you give us a trial.

Women Urge Continuance of Fight Against Vice

Representatives of women's organizations totaling 6,000,000 voting members appeared at the semi-annual meeting of the U. S. Interdepartmental Social Hygiene Board in Washington to urge the continuance of this government activity this coming year, at a cost of \$225,000.

The Interdepartmental Social Hygiene Board carries on the government war against vice as it affects the health of the men in the army and navy. The secretaries of War, the Navy and the Treasury, and the surgeons general of the army, navy and public health service are members of the board, of which a woman doctor, Dr. Valeria H. Parker is the active head.

This past year, it was shown at the meeting, the social hygiene board saved the government \$1,112,600. This is figured from the cost of hospital treatment for men who contract diseases through promiscuous sex relations. The cost of these diseases for 1921 is placed at \$1,500,000. In 1920 the cost was \$3,512,000. In 1919 it was \$15,000,000. During the war period it was \$72,000,000.

The rates for social disease in the army and navy have been cut from 91 per 1,000 men per year to 62, due to the closing of red light districts near army and navy stations. The rate among the U. S. troops in Europe where vice openly exists, is about 165 per 1,000 men.

About \$500,000 of government funds remains to the credit of various universities and State Boards of Health, applicable to the continuance of the fight against social diseases which the nation is waging for the protection of the health of its men in uniform.

The money was appropriated in 1920, for medical and educational research for the treatment of social diseases and their causes, and for the establishment of free medical clinics for patients unable to afford the cost of private treatments and expensive drugs needed for the cure.

Hentsch Bros., Do Trucking at Mokena

Hentsch Bros. will take over all the trucking work formerly done by the Kohl Bros. Hentsch Bros. will do all kinds of trucking promptly to any place at a reasonable rate. Tel. Mokena 44.

Mrs. Hugh Deadmore is attending a State convention of the Daughters of Liberty in Chicago this week as a delegate of the Mizpah Council, Daughters of Liberty, of Joliet.

Dan Kohl and brother Alphonse left Thursday on an auto trip to Mason, S. D., where they will visit for a while with their brother Frank. Dan Kohl has been in poor health, and hopes this trip will benefit him.

Mrs. W. E. Washburn and daughter Genevieve of Bartlesville, Oklahoma, have been guests of Mrs. A. C. Scheiblich the past week. Mrs. Washburn was a former resident of Mokena.

Mr. and Mrs. Louis Dnring son Edward of Roseland and Miss Ruth Schwark of Michigan City were guests of Mrs. John Semmler over Sunday.

Born, to Mr. and Mrs. Milton Krapp, on Monday, a son.

Born, to Mr. and Mrs. Barney Hostert, on Saturday, a son.

Miss Dora Mellbaum of Chicago was a guest at the Eggers home Sunday.

The village board requests all property owners having trees growing along the public sidewalks to trim these trees, as the branches are very low and hard to pass under in rainy weather.

The 17-year locusts have put in their appearance, and are to be found by the million in the woods around here, as well as in gardens. No damage has as yet been reported. They are keeping the air filled with their song all day long.

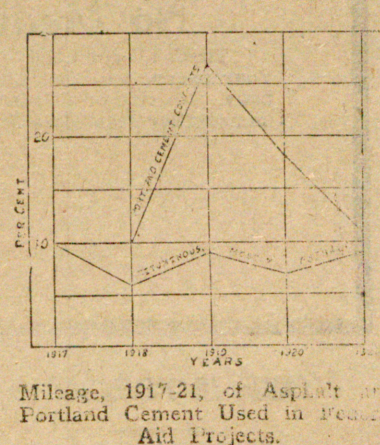

Most Difficult Things in Life.

A Danish paper recently asked the readers to state what is the hardest thing in the world to do. It received many more replies than it had anticipated, some of which are as follows: To be a toe dancer if you weigh 200 pounds, to get back borrowed books, to trim one's nails while wearing boxing gloves. Some of the readers took the question seriously and answered it seriously. One replied that to live without telling a lie was the most difficult of all.

Types of Road Built Under Federal Aid Projects

THE United States Bureau of Public Roads, during the five years 1917 to 1921 inclusive, has approved the expenditure of \$518,275,533.08 for the construction of 28,461 miles of Federal aid highways.

The policy favored by the Chief of the Federal Bureau, Thomas H. MacDonald, is to bring about the keenest competition among the various types of pavement.

Of the construction types, higher than waterbound macadam, the keenest race has been between the flexible pavements, represented by the asphaltic types, and those in the rigid class represented by Portland cement concrete. In 1917 the bituminous types, mostly asphalt and the Portland cement concrete type, each represented about 10 per cent of the total mileage paved. In that year, the exact mileage being 32.3 for the bituminous types and 33.3 for concrete. In the next year Portland cement concrete remained at

Frankfort

The St. Peter's Evangelical Sunday school is making big preparations for their annual picnic, to be held in the Borman grove, Sunday, afternoon, June 11th. Everyone is invited. A very big attendance is looked forward to.

The Frankfort Industrial Club is working on their annual Fourth of July program, and will pull off one of the best celebrations held in Frankfort for years.

The Frankfort baseball team has been taken under the protection, so to say, of the Frankfort Industrial Club, which will boost the team and promote the great American sport in Frankfort. The diamond has been changed from the Maru field to the Borman grove, where a new diamond has been built by the Industrial club. With bigger and better organization, the Frankfort baseball team will be a strong aggregation, and some very good games are scheduled for the summer.

The Ladies' Aid of the St. Peter Evangelical church did well at their supper on Memorial Day, clearing \$80. The Brotherhood of this church met Tuesday evening at the church parlors.

Dr. W. V. Hedges returned Monday from Faribault, Minn., where he was called last week by the illness of his father, who is somewhat improved at latest reports.

Word comes that Henry Koerner, former resident of Frankfort, is building a bungalow in Los Angeles, and has gone into the garage business.

The Home Improvement club met with Mrs. Labuse Thursday.

The Frankfort Home Improvement club was well represented at the Will County Federation of Women's Clubs meeting, held Wednesday at the home of Mrs. R. J. Barr at Cherry Hill. About 18 from Frankfort were present. A nature study program was carried out.

A big church supper is being planned for by the Frankfort M. E. church, to be held at the church parlors on June 16.

Frankfort has been without a dentist since Dr. O. Oesterle left here. Several dentists have been looking over the field here, and it is probable that one will locate here soon.

CARD OF THANKS

I wish to thank all my friends and neighbors for their kindness and sympathy shown during the illness and death of my beloved mother, Mrs. Redlin; also for beautiful floral offerings.

Mrs. FRANK EISENBRANDT.

NEW LENOX

Mrs. George Morris, of New Lenox, entertained the eighth grade graduates of the Central school, Joliet, with their instructor, Miss Frances Wilson, at her home, Saturday. Hours were spent informally, and at 4 o'clock luncheon was served. Guests were Misses Leona Jensen, Mabel Lorenz, Gladys Morris and Edward Morris.

We are giving FREE a Rid-Jid Ironing Board (Retail price \$5) to every purchaser of a Sunbeam Electric Iron \$7.50

\$1 down—\$1 a month

Our Prices Are Right

A Wonderful Burner With the Rockweave Wick

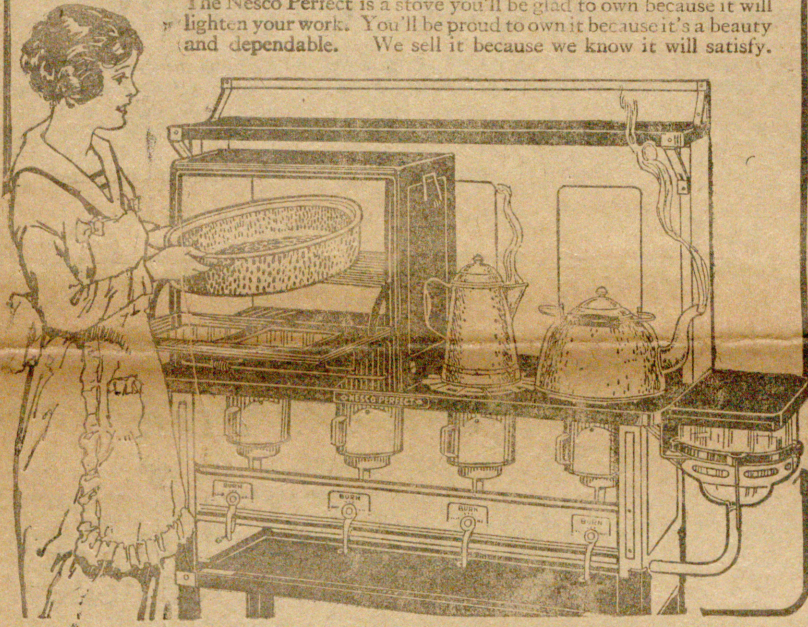

Cooking is made easier, the burden is lifted as soon as one installs a

Nesco Perfect Oil Cook Stove

The Burner furnishes a beautiful hot blue flame. When out the burner bowl has carried the Rockweave Wick right up out of the oil level and all the residue oil has burned out so that the wick is dry. No harm done because it is the Rockweave Wick. It is non-burnable—easily removed to clean off carbon—easily replaced because no ratchets and gears.

The pointer handle turns from side to side, back and forth to turn the flame up or down. Easy to regulate.

The Nesco Perfect is a stove you'll be glad to own because it will lighten your work. You'll be proud to own it because it's a beauty and dependable. We sell it because we know it will satisfy.

MOKENA HARDWARE CO.

Inexpensive Long-Distance Calls

The Bell system offers a time and money saving plan for making long distance telephone calls.

Get the telephone numbers of your customers in Milwaukee, St. Paul, Minneapolis, Omaha, Des Moines and other cities so that when you have something important to say you can save time and money by calling them on the "station to station" basis.

Get acquainted with the money and time saving "station to station" service.

Calls made between 8:30 p. m. and midnight on the "station to station" basis cost but little more than one-half the day charges, and made after midnight about seventy-five per cent less than day calls.

CAN NOW WALK AS WELL AS EVER

Esteemed Lincoln Resident Declares
Tanlac Has Made a Clean Sweep
of Her Rheumatism and
Other Troubles.

"I couldn't believe all they said about Tanlac until I tried it myself, and now I never doubt what I read about it," said Mrs. Anna B. Crawford, 2500 N. 23rd St., Lincoln, Neb., wife of a well-known retired business man.

"I got into a badly run-down condition," she continued, "and suffered greatly from indigestion. I had headache for days at a time, slept poorly and woke up mornings so weak and dizzy I could hardly get up. Then rheumatism set in and made walking difficult and I could scarcely use my arms for the pain."

"But Tanlac has made a clean sweep of my troubles, brought back my appetite and enabled me to gain much weight. It is a pleasure to make a statement in praise of this great medicine."

Tanlac is sold by all good druggists.

Even the aristocratic passenger on a sleeping car doesn't object to a lowly berth.

COULD HARDLY STAND AT TIMES

Hips, Back and Legs Would
Have That Tired Ache

Everett, Washington.—"For several years I have had trouble with the lower part of my back and my hips and my legs would ache with that tired ache. I could hardly stand on my feet at times. I was always able to do my work although I did not feel good. I saw Lydia E. Pinkham's Vegetable Compound advertised and having heard several praise it I decided to try it. I feel first-rate at the present time. It has done wonders for me and I keep it in the house right along. I always recommend it to others who are sick and ailing."—Mrs. J. M. SIBBERT, 4032 High St., Everett, Washington.

To do any kind of work, or to play for that matter, is next to impossible if you are suffering from some form of female trouble. It may cause your back or your legs to ache, it may make you nervous and irritable. You may be able to keep up and around, but you do not feel good. Lydia E. Pinkham's Vegetable Compound is a medicine for women. It is especially adapted to relieve the cause of the trouble and then these annoying pains, aches and "no good" feelings disappear.

...has done this for many, many women: why not give it a fair trial—now.

RADIO

INSTRUCTIONS FOR TROUBLE SHOOTING

How to Detect and Remedy the Open Circuit, Short Circuit and Leakage.

Radio circuits are subject to the same ills that the ordinary power circuits are subject to. However, to cure them is not such a difficult task as might be supposed, especially if some logical procedure is used.

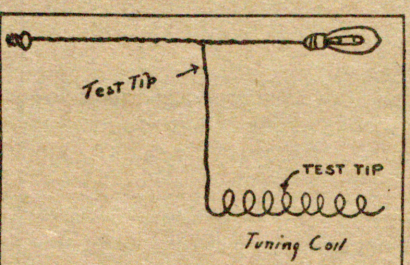

If a receiver is well put together in the first place and all contacts and other parts gone over once in a while, there is no reason why there should be any trouble. But the human being is prone to err, so that for the "once in a while" that is liable to happen, this article will be devoted to the explanation of what might happen to a simple receiver and the best way to fix it.

The usual troubles of the receiver fall under one of the following three headings:

- 1—An open circuit.
- 2—A short circuit.
- 3—Leakage.

An open circuit can most easily be detected by means of a series lamp. Nearly every one has available the ordinary 110 volt lighting circuit. Take an ordinary extension cord and cut one wire at any convenient place and use these two ends as test clips or tips. The extension cord is plugged into the house lighting circuit at any convenient outlet and when the two cut ends are held together the lamp will light as the circuit is closed. When the tips are held open the circuit is "open" and the light will go out.

Suppose it is desired to test for an open circuit in a tuning coil. Connect one tip to one end of the winding and the other test clip to the slider. As the

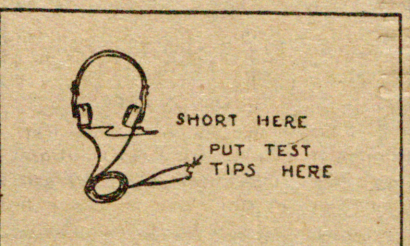

slide is moved back and forth the light should remain lighted. If the light goes out at times there is an open circuit in the coil. If the light goes out when the coil is jarred the slider does not make good contact with the winding.

If a buzzer and battery are available they can be used in testing for an open circuit in the same way that the lamp can be used. Connect the battery and buzzer in series with the test clips or tips and any low resistance circuit can be tested.

The ground connections can be tested with a buzzer and battery, but do not use the house-lighting circuit to test for grounds because one side of the lighting circuit is already grounded and if the other side were connected to the ground a short circuit would exist and an excessive current flow.

If the ground wire is connected to the water pipe, connect one test tip to the ground and the other to the gas pipe, which is also grounded. The buzzer should buzz if one has a good low resistance ground.

Leakage usually exists between the antenna and the ground. An antenna should be well insulated from its support. The lead-in should be brought down to the point where it enters the wall of the station in such a manner that when the wind causes it to swing, it cannot touch any grounded material, and that rain and snow cannot cause a path along which the current can ground. In bringing the lead-

To Test Telephone Cords.

In through the wall, insulate it well and inside the station use as short a piece of well-insulated wire as is possible to make good connection with the set.

To test the continuity of the circuit of a pair of telephone receivers, touch the tips of the cord phone to the tongue. If the receivers are in reasonably good condition a slight click will be heard. If the response in one receiver seems to be weaker than that in the other, examine the diaphragm of the receiver giving the weaker response and see if it is bent toward the pole piece. Try tuning the diaphragm over if such is the case. Be careful when the diaphragm of a receiver is removed that the leads of fine wire from the magnet spools to the connection blocks do not become broken in handling.

If the continuity of the circuit of a pair of telephone receivers is checked and no response is heard when the cord tips are touched to the tongue, try checking each receiver of a double head set separately.

The two receivers are connected in

TIPS TO THE RADIOIST

The higher the aerial the stronger the signals. An increase of five to ten feet in the height of the flat top aerial will increase signals.

Addition of a variable condenser to the secondary or to the primary of a loose coupler often helps to tune out the undesired signals.

The sliders on tuning coils often make poor contacts with the slide rod. Thus much of the signal strength is lost. You can overcome this by soldering a flexible wire to the slider.

Increase length of spreaders of two, three or four-wire aerials from six to ten feet for best results. Each wire should be from four to six feet from its neighbor. Two wires one or two feet apart are no better than one wire. Likewise four wires on short spreaders are no better than one wire.

series and to check either one separately, short circuit the tips of the cord leading to the other receiver just outside of the case. Should it appear that there is an open circuit in the cord, short circuit both receivers where the cord enters the case and with a buzzer or lamp connected to the tips on the end of the cord test for an open circuit.

Care should be exercised by the operator when adjusting a crystal detector to see that his fingers do not touch the surface of the crystal or the contact point of the little spring. The oil secretion that exists in the skin together with the dust that it collects will render a crystal detector inoperative by the insulating film that it will cause to form on the portion of the crystal surface that is touched. Should the surface of the crystal get dirty as evidenced by the received signals becoming weaker and weaker, try cleaning the crystal with alcohol and a little brush. Or if this does not seem to remedy the trouble, chip off old surface so that an entirely new surface is presented to the spring.

AMATEURS SHOULD PLAY FAIR

Radio Inspector Schmidt Urges That They Learn the Laws and Regulations.

Nine out of every ten radio fans are good sports, but the tenth is either a fan with poor judgment or a "rotter." It is up to the amateurs to see that restrictions are not imposed upon them, by playing fair, says Radio Inspector L. R. Schmidt of the Ninth district.

This can be done by observing certain cautions and by becoming posted on the radio laws and regulations. A copy of these regulations may be obtained from the superintendent of documents, government printing office, Washington, D. C., for 15 cents. It is worth while to spend 15 cents in order to be a "square shooter" in the radio game.

The great trouble with amateurs is that when they want to send a message around a corner they put on all the power they have with the hope that some one in Texas might pick up their message. The object should be to use the minimum amount of power to get the message to its destination. "In all circumstances, except in case of signals or radiograms relating to vessels in distress, all stations shall use the minimum amount of energy necessary to carry out any communication desired."

Amateurs should keep their wave length to 200 meters. They should use a "pure wave" or, as the regulations state, "if the sending apparatus is of such a character that the energy is radiated in two or more wave lengths, more or less sharply defined, as indicated by a sensitive wave meter, the energy in no one of the lesser waves shall exceed 10 per cent of that in the greater."

The wave must be "sharp." As to this the regulations state: "...t all stations the logarithmic decrement per complete oscillation in the wave trains emitted by the transmitter shall not exceed two-tenths when sending distress signals or signals and messages relating thereto."

Amateurs frequently are at fault in calling stations too often. The law states that they can call three times, send "d e" once and sign their station call three times; but often the amateurs will send the calls a dozen or more times.

HOW TO GROUND AN AERIAL

If Properly Done It Really Protects the Property From Lightning.

Generally speaking, aerials do not attract lightning, but they do store up atmospheric electricity, and, of course, this condition does create a hazard. However, when the aerial is properly grounded it then acts as a lightning rod and really protects the property from this electrical hazard.

Briefly, the fire underwriters require that the aerial be grounded when not in use by a copper wire no smaller than B. S. Gauge No. 4 or larger, and run said wire as directly as possible to the outside ground.

This means that water, gas or steam pipes inside the property cannot be used for a lightning ground, because if ever this ground was called into service there is a possibility that fire and loss of life may result. So do not use inside grounds for lightning protection.

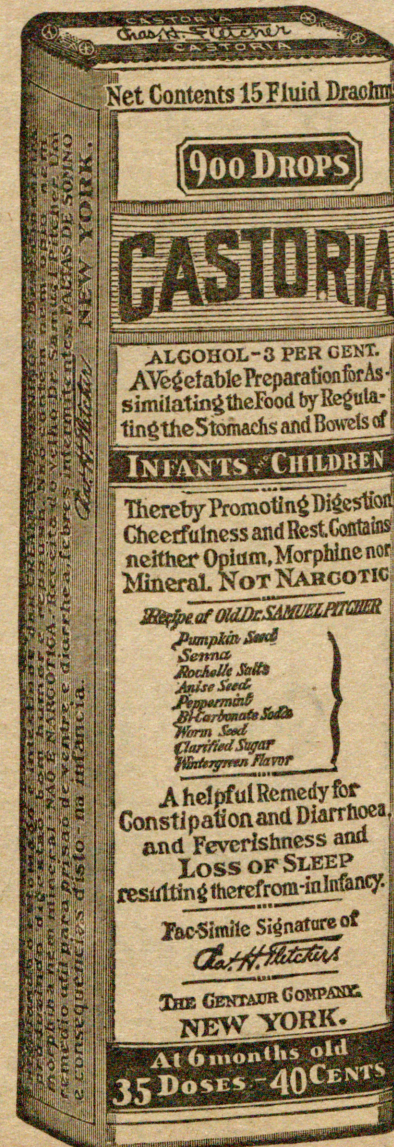

Baby Specialists.

THAT there are Physicians who specialize on Infant ailments you know. All Physicians understand Infant troubles: all Physicians treat them. It is his profession, his duty, to know human ills from the Stork to the Great Beyond.

But in serious cases he calls in the Specialist. Why? He knows as every Mother knows, or ought to know, that Baby is just a baby, needing special treatment, special remedies.

Can a Mother be less thoughtful? Can a Mother try to relieve Baby with a remedy that she would use for herself? Ask yourself; and answer honestly!

Always remember that Baby is just a baby. And remembering this you will remember that Fletcher's Castoria is made especially for Infants and Children.

Exact Copy of Wrapper.

Children Cry For

Fletcher's
CASTORIA

The False and the True.

Advertising by the use of large space, the expenditure of huge sums of money have placed on the market, have put in your home, perhaps, many articles that today have been discarded, as you will readily admit.

Do you recall anything that has more modestly appealed to the public than has Fletcher's Castoria: modest in all its claims, pleading at all times—and truthfully—for our babies?

The big plurge, the misleading claims may win for a time, but the honest truth-telling advertiser is like the old story of the tortoise that beat the hare.

Mothers everywhere, and their daughters, now mothers, speak frankly, glowingly, enthusiastically in praise of Fletcher's Castoria. Speak of it lovingly as a friend that has brought comfort, cheer and smiles to their little one.

To them: to these true mothers no argument can induce them to set aside their bottle of Castoria, their old friend, that they might try even another and unknown remedy for babies. Then, would YOU think of going to YOUR OWN medicine chest to find relief for Baby's troubles? Can you not separate the false from the true?

MOTHERS SHOULD READ THE BOOKLET THAT IS AROUND EVERY BOTTLE OF FLETCHER'S CASTORIA

GENUINE CASTORIA ALWAYS

"Was?" returned his honor. "Have they moved the town?"—Indianapolis News.

SWAMP-ROOT FOR KIDNEY AILMENTS

There is only one medicine that really stands out pre-eminent as a medicine for curable ailments of the kidneys, liver and bladder.

Dr. Kilmer's Swamp-Root stands the highest for the reason that it has proven to be just the remedy needed in thousands upon thousands of distressing cases. Swamp-Root makes friends quickly because its mild and immediate effect is soon realized in most cases. It is a gentle, healing vegetable compound.

Start treatment at once. Sold at all drug stores in bottles of two sizes, medium and large.

However, if you wish first to test this great preparation send ten cents to Dr. Kilmer & Co., Binghamton, N. Y., for a sample bottle. When writing be sure and mention this paper.—Advertisement.

For Falling Hair.

"My hair is falling out," admitted the timid man to the chemist's assistant. "Can you recommend something to keep it in?"

"Certainly," replied the obliging young man, who had only recently left school. "Here is a nice cardboard box."—Pearson's Weekly.

Established a Record.

An Irishman, who was to return to his native land by a certain steamer, arrived on the pier just as the vessel was starting—in fact, she was already on the move.

Taking a flying leap, he covered the intervening space of six or eight feet at a bound, but tripped on alighting and hit his head, temporarily stunning himself.

When he recovered his senses, the vessel was a couple of hundred yards out at sea.

"Be jabbers!" he exclaimed, not realizing what had happened, "what a jump."

Open Season.

"Sap is running in the baseball bats." "Been running a long time in the golf clubs."

Next Case.

Judge (trying liquor case)—What is the next case?
Clerk (absently)—Scotch, your honor.

Freshen a Heavy Skin

AMONG THE CHURCHES

The annual Sunday school convention of the Sunday schools of Homer and Marley was held Sunday afternoon, at the Marley church.

An interesting program was carried out. Rev. Love, of Plainfield, president of the Will County Sunday School Association; Dr. Gage, of Chicago, and Rev. Elmer Palmer, of the Mokena M. E. church, took part in the program. Vocal and musical numbers were given by Mr. Rowley, of Homer; Miss Dorothy Herschback, of Frankfort; Marion and Marvin Lockwood, of New Lenox, and Marcia Liess and Florence Cooper, of Mokena.

Many interesting and inspiring facts concerning the present day Sunday school work were touched on.

One of the important features of the gathering was the extension of the convention district so that the Sunday schools of New Lenox, Frankfort and Mokena are embraced in the district in addition to those of Homer and Marley. Good-sized delegations were present from New Lenox, Frankfort and Mokena. Mrs. Ward Busch was the outgoing president. The following officers were chosen for the new district:

President, Mrs. Arthur Laufer, Marley.

Secretary, Miss Florence Cooper, Mokena.

Treasurer, Mrs. Geo. Andrew, Frankfort.

ORLAND M. E. CHURCH

The Epworth League of the M. E. church had charge of the evening services on Sunday, June 4. The first vice-president, Miss Harriet Austin, had charge of the program, which was as follows:

Song by Congregation.
Prayer... Rev. M. H. Neumeyer
Song by Congregation.
Scripture Reading... George Agate
Epworth League Lesson... Miss Clara Myrick
Duet... Mrs. Joe Creer
Mrs. Elmer Newton
Address... Rev. M. H. Neumeyer
Piano Solo... Miss Dorothy Hansen
Song by Congregation.
Benediction... Rev. Neumeyer

The Children's Day program of the M. E. church will be held during the morning services on next Sunday, June 11. The program is in charge of Mrs. Leonard Kay, Mrs. Clarence Beagley and Miss Esther Gee.

MOKENA M. E. CHURCH

One of the best musical concerts which it has been the privilege of the Mokena public to listen to, will be held under the auspices of the M. E. Sunday school of the M. E. church, at the M. E. church, on Tuesday evening, June 13th, when a program of high class music will be carried out by noted Joliet talent.

Prof. J. M. Thompson, musical director of the public schools of Joliet, together with Eugene Holmes, Paul Meyers, Alice Schovfield, Wm. Davis, Mrs. Thompson, and Miss Martha Wylie, reader, of Plainfield, will furnish the program.

The following instruments will be used: Malophone, clarinet, cornet, saxophone and piano. These different instruments will be heard in solos and together as a full orchestra. Prof. Thompson will sing.

It is hoped that this concert will be well patronized, as the above names alone are sufficient guarantee of the good things that will be in store for those who come. Advance tickets are on sale now.

Commencement week at the Mokena Public School started Sunday, when the annual baccalaureate sermon was preached by Rev. E. Palmer, at the M. E. church.

Rev. Wm. Kreis, pastor of St. John's Evangelical church, offered the invocation and read the Scripture lesson. The choir sang several selections. The student graduates, headed by Prof. and Mrs. Flaghty, marched in with the opening of the service and occupied seats decorated with the class colors.

Rev. Palmer selected for his theme the subject, "What Is the Purpose of Education?" He divided his discourse into four parts, showing that education first enriches life; secondly, builds character; thirdly, means to render service; and fourthly, to build for a life of the future. He told the graduates that there are three things they should bear in mind as they enter on the threshold of life: First, get all the education possible; secondly, build a noble character; and thirdly, to link up their lives with the greatest possible achievement.

On Thursday night the annual Commencement exercises were held at the Hatch hall. On Friday the graduates go on a picnic excursion to Moosehart.
